SECTION I:
OVERVIEW OF COMMUNITY WORKING GROUP

Introduction to Berkeley Global Campus at Richmond Bay
On October 29, 2014, UC Berkeley Chancellor Nicholas Dirks unveiled his vision for the Berkeley Global Campus at Richmond Bay (BGC) in an address to the Academic Senate. While other internationally focused projects launched by universities have been located abroad, the Chancellor’s plan calls for the creation of a new research and action hub on University-owned land in Richmond that can attract and engage an international coalition of academic institutions, private sector, and community partners. Early discussions between the University of California Berkeley (University) and universities outside the United States have centered on research and education programs addressing complex global challenges, including: Climate and Energy, Big Data, Precision Medicine, Public Health, and Global Governance. Conversations with potential partners in the region have focused on a variety of educational, public health, community outreach, labor, and transportation partnerships.

Commitment to Plan with and Support the Richmond Community
Although the research foci has changed, the Chancellor and Lawrence Berkeley National Laboratory (LBNL) Director reiterated their commitment to the Richmond community, pledging to plan with the community and to develop the BGC in a manner that will serve as a catalyst for Richmond’s South Shoreline. Through the Richmond Bay Specific Plan, the City of Richmond is leading the way to improve infrastructure and enhance transportation, residential and commercial development to ensure the BGC is part of a sustainable and vibrant community that includes jobs, business opportunities and an array of recreation and social outlets.

A number of the recommendations in this report compliment strategies the City and other public sector institutions have underway. The BGC Community Working Group (CWG) was launched and supported in fulfillment of a Joint Statement of Commitment by the two leaders to commit the University and the LBNL to joint planning with a diverse set of community stakeholders who would serve on the CWG to develop recommendations for benefits that could accrue to the Richmond community through the new project.

Evolution and Progress of BGC Community Working Group
The University and the LBNL managed an open process to solicit nominations for the CWG. More than 50 applications were received as community, business, and public sector organizations selected leaders to represent their interests. With the intention to leverage an inclusive, collaborative planning process to strengthen existing partnerships and establish new relationships in Richmond, the University and LBNL Government and Community Relations Offices sought the advice of respected community and public sector leaders before making recommendations to the Chancellor and LBNL Director to invite a diverse set of community stakeholders who would serve on the CWG.
Vision for Berkeley Global Campus at Richmond Bay

“We have the opportunity to become the first American university to establish an international campus in the United States, right here in the East Bay. The BGC will bring together academic institutions, private sector and community partners who will collaborate on research addressing complex global challenges… from Climate Policy to Global Governance, from Big Data, to Precision Medicine, and Public Health.”

“One thing that has not changed is our commitment to the community. The University is committed to working in partnership with the City of Richmond to ensure the success of the Richmond Bay Specific Plan which will improve infrastructure, enhance transportation, residential and commercial development, ensuring the BGC is part of a sustainable and vibrant community that includes jobs, business opportunities, and array of recreation and social outlets.

--UC Berkeley Chancellor Nicholas B. Dirks

In response to community input, the initial group of CWG members was expanded to include additional representatives from labor unions, community organizations, affordable housing, and the neighborhood adjacent to the BGC. At present, the CWG has a total of 24 leaders, including two non-voting representatives of the University and the LBNL. The CWG is co-convened by a Community Co-Chair and the Government and Community Relations Directors of the University and the LBNL. A full roster of the CWG is listed below.

From September 2014 through September 2015, the CWG was staffed and facilitated by UC Berkeley and the LBNL Government and Community Relations Offices. The CWG monthly meetings are open to the public and held in the evenings at the site of the Berkeley Global Campus (formerly the Richmond Field Station). The Chancellor’s Office provides notices of all meetings and regular updates of the meeting outcomes via electronic newsletters that reach over 600 recipients. Community interest in this process has been strong. The numbers of participants at the monthly meetings are consistently around 75-100. Attendance at the November 2015 Community Briefing and Open House, led by the CWG at the Richmond City Civic Center, attracted more than 200 community and civic leaders.
The materials and the decisions made at all CWG and subcommittee meetings are posted on the Chancellor’s Office website. The University and LBNL staff provide in-person updates on the CWG process to community and civic organizations and local, state, and federal officials upon request.

**CWG Mission and Charter**

The CWG’s early efforts focused on establishing an effective working group process. Toward this end, the CWG charged a subcommittee to developing a draft Mission and Charter that outlined rules of engagement and decision-making and the process to develop recommendations for five community benefit arenas: **education, local hire, workforce training, local procurement, and affordable housing**. The Mission and Charter Subcommittee recommended a priority focus on recommendations that lead to legally binding agreements in these same arenas. The CWG Mission and Charter (attached in Appendix A1) were adopted at the February 2015 CWG meeting.

In September 2015, as the CWG took up the task of developing and voting on recommendations, MIG, Inc. – a nationally recognized process facilitation firm— worked with the CWG to refine its decision making process. MIG was enlisted to strengthen the CWG process and guide an accelerated recommendations development process. To that end, MIG assembled a diverse team of expert process facilitators who have served the CWG ably by ensuring effective and timely discussion and decision making.

Apart from adding sophisticated facilitation and documentation techniques, MIG also recommended new decision-making and consensus-building tools. Equally important, in recognition that full agreement of every recommendation might not be possible, MIG developed a process for capturing minority opinion. To include a differing option in the recommendations to the Chancellor and the LBNL Director, a CWG member need only draft up their minority opinion and submit it to the CWG to be included with the majority opinion. In at least one case, a community member was also invited to do so.

**Structure of CWG Subcommittees**

From the spring through the summer of 2015, the CWG shifted its focus towards launching subcommittees to develop actionable recommendations in the five community benefit arenas. CWG members felt it was important to build a foundation of common knowledge before developing recommendations or taking votes on the recommendations. Therefore, CWG member-led subcommittees were asked to undertake abbreviated landscape assessments to develop presentations for the CWG that included:

- **Baseline data on community conditions** and desired results in each community benefit arena;
- **Local assets to build upon**, including: policies, partnerships, program strategies, and investments;
- Existing University and LBNL commitments and programmatic strategies;
- **Recommendations** submitted to the University and the LBNL to date; and,
- Relevant **best practices** research
The CWG members on each subcommittee had the option to enlist community and technical expertise. Each subcommittee also benefitted from the involvement of University and LBNL leadership and program managers who are currently engaged as partners or supporters of programs and initiatives in Richmond that address the community conditions. Apart from the two voting CWG members, the role of University and LBNL leaders in this process was to provide information about campus-based efforts and to clarify policy and budget related constraints that might be encountered.

The University and LBNL also requested that the CWG’s subsequent efforts to develop actionable recommendations build on local assets and a long history of collaboration between the campus, LBNL and Richmond community. More specifically, in addition to identifying University and LBNL commitments, the CWG was encouraged to develop recommendations that align University and LBNL leadership and investments with public sector institutions’ equity and opportunity-based policies and strategies; draw on existing campus and community partnerships; and highlight specific roles and responsibilities for local partners in the implementation of the recommendations.

A full roster of each Subcommittee is available in Appendix A2.

**CWG Process Schedule**

A graphic representation of the CWG process schedule is included on the following page, which outlines key CWG activities, meetings and milestones.
SECTION II:
FINAL CWG RECOMMENDATIONS

Introduction to Recommendations
Each CWG Subcommittee engaged in a collaborative, consensus-building process to formulate a clear and succinct set of recommendations that will lead to binding, legally enforceable commitments to the Richmond community regarding benefits from the BGC in the following arenas:

- Local Hire/Workforce Training;
- Housing;
- Education; and,
- Procurement.

The following section outlines background on the recommendation development process, context and assets to build upon (i.e., the rationale for the recommendations), and a brief summary of each subcommittee’s recommendations. The detailed matrices with each subcommittee’s full set of recommendations are available in Appendices B-E.

Local Hire/ Workforce Training Subcommittee

Background on the Recommendation Development Process
Facilitated by Armando Viramontes, LBNL Director of Government & Community Relations, and Noe Nolya, of the MIG group, the Local Hire subcommittee’s recommendations are designed to increase the numbers of Richmond residents that are prepared for and secure construction and non-construction jobs at the Berkeley Global Campus. A second priority, to develop recommendations to strengthen education and workforce training pathways to college and good jobs and careers associated with the industries that benefit from research that is conducted at the campus was initially undertaken by a subcommittee focused solely on workforce was narrowly focus on construction and facilities maintenance jobs and subsumed within the joint Local Hire and Workforce Training committee.

Subcommittee Composition
The Local Hire & Workforce Training Subcommittee has relied on participation from community advocates, unions and trades, capacity-building and workforce training groups, re-entry service providers, and legal experts. Together, the group has collaborated to develop set of strategies and goals that seek to ultimately improve the lives of Richmond workers and their families. The collaboration included a diverse cross section community and public sector leaders and the following organizations:

- Alliance of Californians for Community Empowerment (ACCE)
- AFSCME 3299
- RichmondWorks and RichmondBUILD
- The Contra Costa County Construction and Building Trades Council
**Context and Assets to Build Upon (Rationale for Recommendations)**

**Baseline Data**
Through both the in-person and phone meetings, the Local Hire and Workforce Training Subcommittee collaborated on a monthly basis over the course of 5 months in the late summer and early fall of 2015. Subcommittee members reviewed data on workforce participation, education and workforce preparation trends among adults, business and industry sectors that employ the greatest number of workers or are expanding, education and training pathways that currently serve Richmond, and relevant employment and workforce policy.

**Gaps in Richmond’s Pipeline**
According to the Richmond Employment and Training Department, the Richmond unemployment rate has trended downward to 6.1% in 2015, a trend consistent with regional and statewide trends following the recovery of the 2008 Housing Crisis. Despite this positive trend, a recurring message from the community, public sector leaders, and members of the Subcommittee echo a need for an overall improvement in the types of jobs offered, livability of wages, and long term career prospects. In other words, there is a need for career building jobs that can help individuals and families thrive, not just survive.

And while Richmond’s high school rate is roughly comparable to California’s, the percentage of people with college degrees is lower than the statewide average of 31.7%. As such, a dearth of opportunities and viable career pathways has been reported for young adults in Richmond. This group is poised to participate in certifications programs that lead to viable middle skill careers in construction and other stable or growth sectors represented by the Berkeley Global Campus. The recommendations set forth by the subcommittee seek to address that gap by proposing an increased level of partnerships between industry, the University, and with local education institutions and workforce training programs.

**Key Industries Expected, Participation Desired**
The subcommittee focused on the industries and sectors that have the most potential to move Richmond residents out of poverty toward economic self-sufficiency and that are expected to have some representation at the Berkeley Global Campus. Among the business sectors with the largest numbers of employees in the area are educational services, health care, professional, scientific & management, administrative services, waste management, and construction. Meanwhile, the health industry, information technology and communications, construction, and high tech manufacturing, transportation, distribution and logistics are key
growth sectors. These industries represent a highly anticipated economic opportunity for Richmond workers and their families.

**Workforce Programs to Build On**
The subcommittee identified a wide array of existing workforce training and educational programs that could be foundational models to bridge the gap in the Richmond’s jobs pipeline. The City of Richmond, for example, operates RichmondBUILD, a nationally recognized construction training skills center. Also, the Contra Costa County Building Trades Council sponsors a variety of apprenticeships and training programs that are widely recognized by industry as well as state and federal labor departments.

In terms of educational institutions, both Contra Costa College and the West Costa County School District additionally offer Career Pathway Programs and Linked Learning Career Academies. Finally, non-profits also manage a number of community-based career pathway programs that include career preparation and counseling services that target individuals reentering the community from incarceration. In addition, other non-profits like Rubicon focus on comprehensive self-sufficiency and economic empowerment strategies.

These existing models, programs, and strategies are well established and operating successfully. Further, and perhaps more importantly, these programs have existing relationships and trust with local Richmond workers and institutions. That community equity developed over time can a be a primary foundational block for any increased efforts at workforce development in relation to the BGC.

**Youth and Educational Opportunities in Place**
The subcommittee also learned about the LBNL’s strategies to inspire and prepare the next generation of scientist, engineers and technicians through investments and partnership with K-8 and High Schools in the East Bay. Several of these efforts benefit children and youth in Richmond. Similarly, the subcommittee reviewed work that the UC Berkeley School of Public Health has undertaken to assist local efforts to align and strengthen career pathway programs that are designed to prepare Richmond youth and adults for careers in the regional health sector.

**Projecting Jobs at the BGC Elusive**
Assessing the future needs of the future BGC and then further aligning those needs with the existing workforce training and educations systems proved to be an elusive undertaking at this point in time. The subcommittee requested data on projected jobs likely to arise directly through BGC construction and operations, and/or indirectly through research on industry clusters likely housed in the future campus. Because the BGC development process is still in its initial phases, the subcommittee was unable to obtain reliable data on either.

**Existing Workforce Policies in Richmond**
The subcommittee’s review of workforce policies or community benefit agreements with relation to the proposed BGC project surfaced as important information. To a large extent, the subcommittee’s local and targeted hiring recommendations are informed by the City of Richmond’s recently adopted Local Employment Program Ordinance (RMC 2.56). The ordinance language has been suggested as a model for any future agreement concerning local hire at the BGC. Richmond’s ordinance requires that 25% of the total project hours on eligible
Public Works Construction projects (costing $100,000 or greater) be performed by Richmond residents. The ordinance also sets a 35% goal for the total workforce and new hires on non-construction contracts of the same scale. The City reports that the 25% local employment goal for Public Works Construction project has been achieved consistently.

**Local Community Benefits Agreement as a Model**

A recently executed Community Benefits Agreement between the Chevron Corporation, the City of Richmond and the Contra Costa Building and Construction Trades on company’s $1B modernization is proven local hire precedent for the BGC. That project calls for Chevron contractors to hire qualified Richmond residents as a first priority in accordance with the existing First Source Agreement. Known as a Modernization Project Local Content Agreement, the compact between the three partners does not set specific goals for employment. Instead, it outlines the roles and responsibilities of each partner in ensuring Richmond residents benefit from the project. Chevron provides a local-hire coordinator to help implement the agreement, provide monthly reports hiring metrics and goals, and to serve as the point of contact to work with contractors, the building trades, and the city.

**Brief Summary of Local Hire and Workforce Training Recommendations**

Overall, for the purposes of applying the Local Hire and Workforce Training recommendations to the development of the Berkeley Global Campus, the Local Hire and Workforce Training Ad hoc Subcommittee is recommending the following definition of “local”:

Residents of Richmond and North Richmond (Including unincorporated areas of North Richmond) will be given priority for jobs at the BGC. The second priority if the local goal cannot be met will be residents of San Pablo.

In addition, the Local Hire and Workforce Training Subcommittee is making six (6) primary recommendations. Generally, these recommend setting percentage goals for the numbers of local and disadvantaged residents that are employed, expanding workforce training programs and options, establishing fair chance policies and providing support for individuals with criminal convictions, and adopting labor standards that support union employment and provide family sustaining wages and benefits. Specifically, the recommendations are described below in further detail explain that UCB and LBNL sign legally binding agreements:

1. To ensure a minimum number of local and disadvantaged workers are able to work on the construction of the BGC.
   - Set the following local hire goals:
     i. 30% of total hours worked on a craft-by-craft basis.
     ii. On Apprentice hours: 30% of hours on a craft –by-craft basis, from local disadvantaged workers.
   - Adopt a Definition of Disadvantaged Worker: local residents who are unemployed veterans, previously incarcerated, emancipated foster youth, homeless, those on extended unemployment, chronically unemployed.

2. To set specific goals and conditions to ensure construction career pathways and employment.
Designate a project manager to coordinate and ensure construction career pathways.

Fund $1 million annually – at minimum – for workforce training needs related to the BGC.

Fund $1 million annually – at minimum – for supportive services for low income and disadvantaged local workers.

Enter into a Project Stabilization Agreement with the Contra Costa Building Trades Council.

3. To ensure BGC operations and maintenance employment opportunities to local and disadvantaged workers, and labor standards that support families.
   - Set Goal for new hires in operations: 50% will be local residents
   - Set Goal for new hires in operations jobs: 30% will be disadvantaged workers
   - Commit to ensuring workers at BGC are covered under same collective bargaining agreements (same wages/benefits) as workers doing comparable work at the main campus
   - Commit to not contract or subcontract: any service that is customarily performed by University employees at the main campus

4. To strengthen pathways between local NON CONSTRUCTION training programs and pathways and NON construction jobs at the BGC
   - Designate a project manager to coordinate and ensure NON CONSTRUCTION career pathways
   - Fund $1 million annually – at minimum – for workforce training needs with related to the BGC
   - Fund $1 million annually – at minimum – for supportive services for low-income and disadvantaged local workers
   - Identify non-construction job-related needs at the BGC and partner to develop curriculum and hands-on experience that supports training programs and pathways to employment

5. To ensure Fair Chance Employment policies for both Construction and Non-Construction such that no applicant can be denied a job simply because of prior criminal conviction.
   - Interview/Application: remove questions about prior criminal convictions
   - Third Party Inquiry: no inquiry into applicant’s conviction history; if required, only after applicant deemed otherwise qualified and offered a job
   - Employer must consider: time elapsed since offense, evidence of rehabilitation activities or mitigating circumstances, if job-related conviction
   - If rejected for employment: written notice including how the conviction may relate to job, opportunity to correct inaccuracies and offer evidence of rehabilitation or mitigating circumstances
   - No consideration of: arrest without convictions, dismissed or expunged convictions, juvenile convictions, and convictions more than 7 years old, misdemeanors, infractions.
6. To establish a **committee to monitor hiring practices and results** that will have community representation and will represent the community members intended to benefit from the community benefits agreements.
Housing and Displacement Subcommittee

Background on the Recommendation Development Process
The Housing and Displacement Ad Hoc Subcommittee launched in September 2015 with the goal of developing a set of strategic recommendations to mitigate displacement and improve access to affordable housing in Richmond. This Subcommittee included Community Working Group members, City of Richmond staff, UC Berkeley Real Estate Division staff, community based organizations such as CCISCO, Alliance of Californians for Community Empowerment and Raise Up Richmond Coalition, local residents and other community representatives. A full roster of Housing and Displacement Subcommittee members and meeting attendees is available in Appendix A2.

During the September 2015 CWG meeting, the Housing and Displacement Subcommittee organized a special set of housing-related presentations for the CWG which included a review of City Of Richmond Affordable Housing policies; review of the Mayor’s Office Affordable Housing Task Force; update on the status of the BGC development; and a presentation on housing recommendations submitted by community stakeholders. The presentation slides from this meeting are available in Appendix C1.

A total of five Housing and Displacement Subcommittee meetings were held to develop draft recommendations, to incorporate community and CWG input, and to finalize the recommendations for CWG approval. Approximately 15-25 participants attended each Subcommittee meeting.

In addition, the Subcommittee assembled a small “mini-group” made up of 4-5 Subcommittee members to assist in further refining the draft recommendations to submit to the CWG. The goal of the mini-group was to streamline the draft recommendations writing process in order to meet the CWG timeline. The Workforce Training/ Local Hire, Procurement and Education Subcommittees used similar “mini-group” approaches to refining their final recommendations.
**BGC Housing Commitments**

The Sub-Committee recommendations build on Chancellor Dirk’s commitment to partner with the City of Richmond in efforts to increase access to affordable housing among Richmond residents that are most vulnerable to displacement.

“The University will address concerns about the affordability of housing in Richmond with binding commitments and with action.

When the City has determined its priorities and overall strategy UC Berkeley expects to make appropriate legally binding commitments to the City.

The University is specifically prepared to consider, for example:

- The ideas of private developer contributions to a City-operated Housing Trust Fund;
- Support for City-planned inclusionary housing, and;
- Development of workforce housing to specifically serve the Global Campus.”

Source: Open letter to the Richmond community from UC Berkeley Chancellor Nicholas Dirks: An update on the Berkeley Global Campus May 28, 2015

---

**Context and Assets to Build Upon (Rationale for Recommendations)**

The Housing and Displacement Subcommittee identified key factors, priorities and issues to consider in the development of the draft recommendations. These critical priorities and opportunities that informed the Housing and Displacement Subcommittee recommendations are synthesized in the section below.

**Benefit Current Residents and “Special Needs Populations” Vulnerable to Displacement**

Subcommittee members elected to focus their recommendations on meeting the needs of low- and very low-income Richmond households who are most vulnerable to potential displacement. Based on the City of Richmond’s Fifth Cycle Housing Element Update (2015-2023), City staff highlight that:

> “Certain households have more difficulty in finding decent and affordable housing due to special circumstances such as economic status, age, disability, household size and household type. As a result, these households may experience a higher prevalence of overpaying, overcrowding, and other housing problems. Special needs populations in Richmond include seniors, large family households, female-headed households, persons with disabilities, and homeless persons and families.”

The Subcommittee’s recommendations focus on addressing housing and displacement issues of low-income, very low-income and special needs’ residents of Richmond.

---

Define Housing Affordability
Subcommittee members emphasized their focus on defining housing affordability for very low- and low-income Richmond households. According to the Department of Housing and Urban Development (HUD),

“The generally accepted definition of housing affordability is for a household to pay no more than 30 percent of its annual income on housing. Households that pay over 30 percent of their income for housing are considered cost burdened and may have difficulty affording other basic necessities.”

The figure below depicts the “Renter Affordable Housing Costs” for a range of household income types (30%-120%).

</table>

In a study recently published by the Haas Institute –Belonging and Community Health in Richmond: An Analysis of Changing Demographics and Housing– researchers noted that “some 6,740 renter households - 37% of the total renters - earn less than $35,000 annually and spend more than 30% of their income on housing [in Richmond].” Given the affordability research and rise of Richmond’s housing market, the Subcommittee highlighted the importance of targeting its recommendations towards the low-income residents most vulnerable to displacement.

Consider the BGC Timeline and the Development Horizon
Given the 30-40 year development horizon of the BGC, Subcommittee members focused on identifying strategies and policies that can be implemented now and throughout the life of the BGC project. The Subcommittee members took into account potential changes to the cost of living, inflation, developer fees and other related metrics during the development of draft recommendations. As a result, the recommendations factor in the desire for immediate

---

benefits to current residents and future benefits that may accrue over the life of the BGC development.

**Identify Synergies with Existing City Programs and Policies**

With the recent update of the City’s General Plan and Housing Element, there are several City policies that the Subcommittee would like to leverage to maximize the housing benefits for Richmond residents. A key goal of many Richmond housing policies is to limit the affordability gap. Mechanisms to achieve this include increasing the affordable housing supply and identifying new funding sources to develop more affordable housing (e.g., new linkage fees). Other Housing Element goals include:

- A Balanced Supply of Housing
- Better Neighborhood and Quality of Life
- Expanded Housing Opportunities for Special Needs Groups
- Equal Housing Access for All

In addition, the Richmond Bay Specific Plan (formerly known as the South Shoreline Specific Plan) will focus on ways Richmond can take advantage of the planned Berkeley Global Campus at Richmond Bay, future ferry service, and other area assets to create a sustainable shoreline district providing jobs, housing, transportation options, and opportunities for entertainment and recreation. The Richmond Bay Specific Plan may accommodate 4,080 housing units of housing and 140 acres of open space.

Currently, the City is also preparing a Nexus Study to support establishment of an affordable housing linkage fee for rental housing and nonresidential development. The fees collected will be used for the provision of new or rehabilitation of affordable housing units.

The Housing Element Update codifies several policies and programs that are directly relevant and synergetic to the recommendations of the Subcommittee, including but not limited to the following policies in the chart below:

<tr>
<th>Brief Summary of Housing and Displacement Recommendations</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Housing and Displacement Subcommittee is making four (4) primary recommendations, and various specific strategies described below:</td>
</tr>
</tbody>
</table>

**Recommendation #1:** UCB and LBNL will agree to pay impact fees to the City of Richmond to establish an Anti-Displacement Fund to be used to build and preserve affordable housing and to prevent displacement.

- Impact fees are based on the construction of residential and non-residential space (office and commercial) in the City.
- The Anti-Displacement Fund will be used to support a wide range of priority programs and initiatives, including renter/homeowner assistance and protection programs, low interest loan programs, pre and post home ownership and foreclosure.
counseling, temporary/short-term housing programs, first-time homebuyer programs and alternative housing models.

- The impact fee amounts UCB/LBNL will voluntarily agree to pay to the City will be determined by a city-wide ordinance that establishes fees for the Richmond context and will evolve over the 30-40 life of BGC development.
- These fees will be informed by the results of the Nexus Study and research on median linkage fees of Bay Area cities.
- If the City does not adopt a commercial linkage fee, there will be a number generated by the Nexus Study and other economic factors that will determine the amount paid based on the Richmond/regional context.

Minority Opinion:
Until Richmond passes a housing linkage fee for non-residential development, UCB will pay the Bay Area median of $15 per square foot for the linkage fee.

- At the November 30th Community Briefing and Open House, many community members indicated their support for establishing a linkage fee of $15 per square foot (which is considered by some as the Bay Area median).
- Until the citywide ordinance that establishes impact fees based on the Nexus Study and other economic conditions is determined, some community members expressed that they would like to use the $15 per square foot Bay Area median for Richmond.

Recommendation #2: UCB and LBNL will build housing on BGC site for the unique needs of the workforce (including faculty) and students to avoid negatively impacting existing and future residents and Richmond neighborhoods.

- To alleviate housing strain on existing neighborhoods, Berkeley Global Campus can provide housing options for students and the workforce by building on-site housing.
- UCB and LBNL should use successful best practices and town/gown models to ensure that the BGC site is well-integrated into the broader Richmond community.

Recommendation #3: UCB and LBNL will provide research and data support related to affordable housing and displacement mitigation by offering expertise of relevant UCB departments, institutes, faculty and student engagement.

- UCB and LBNL will collaborate with the City to study the feasibility of non-traditional forms of affordable housing (like Community Land Trusts, coops, etc);
- UCB and LBNL will collaborate with the City to identify preferred models to implement in Richmond; this study is independent of the impact fee and the Anti-Displacement Fund;
- UCB and LBNL will collaborate with the City to identify relevant promising practices to preserve/develop affordable housing, as well as anti-displacement initiatives that have worked in the past 10 years in cities similar to Richmond.
• This research and data support can happen apart from and ahead of any BGC development.

• In addition, UCB and LBNL will identify, adopt and **apply a consistent set of criteria to evaluate and measure a project’s potential to displace residents** using demographic/economic data, and other sources.

• The City of Richmond and UCB will consider approaches to **establish place-based Initiatives** to improve neighborhood amenities and services in low-income and very low-income areas (e.g., partnership research projects).
Education Subcommittee

Background on the Recommendation Development Process
Led by Tammeil Gilkerson, the education subcommittee’s recommendations are designed to increase the number of Richmond students who are prepared for career and college. UC Berkeley and the Lawrence Berkeley National Lab can facilitate this by increasing the number of Richmond students who benefit from UC Berkeley and the Lawrence Berkeley National Lab’s strategic investment in education and career pathways, aligning with the priorities of existing equity-based education strategic plans and initiatives.

The Education Subcommittee was formed in March 2015 and benefited from the leadership of representatives from the City of Richmond, West Contra Costa Unified School District staff and board of directors; Contra Costa College, Contra Costa Interfaith Supporting Community Organization, The Safe Return Project, The California Endowment, The Ed Fund, The Richmond Community Foundation, as well as various UC Berkeley departments, and Richmond students, parents and educators, and the involvement of a diverse cross-section community leaders who provided feedback on the draft recommendations through subcommittee outreach and Community Working Group meetings and briefings.

Context and Assets to Build Upon (Rationale for Recommendations)
The Education Subcommittee launched in March 2015 with a presentation to the CWG (Appendix D1) that provided select baseline data and suggested assets to leverage; highlighted the importance of understanding and listening to the voice of the Richmond education stakeholder voice: students, parents, and community organizations; as well as an overview of key UCB and LBNL programs and projects currently operating in Richmond. The baseline picture of local education assets, needs and priorities, and the potential for strengthening partnerships with UC Berkeley and LBNL to improve education investments in Richmond was – and remains – promising.

For example, the school district and community college both seek to improve the educational outcomes for Richmond students and provide a number of education and career pathways that require educational and industry partners. At the high school level, there are currently linked-learning opportunities at Richmond’s De Anza, Kennedy and Richmond High Schools that span from internet technology to health sports medicine, creative arts to an engineering academy. And Contra Costa College works directly with high school academies to provide pathway programs and concurrent enrollment in biotechnology, health (CNA/EMED), and Administration of Justice/Law; and collaborates with partners in regional and local work around building career pathways, including work-based learning & engaging employer partners in four high-wage, high-demand industry sectors: Information Communication Technology (ICT) and Digital Media; Health and Biosciences; Advanced Manufacturing and Engineering; Public Services & Law.

The City of Richmond provides leadership in the education arena through a number of innovative policy tools, such as: including an Education and Human Services Element in Richmond General Plan; implementing a “Health in All Policies ordinance that recognizes that Education has broad impacts on standards of living and social interactions, with consequences for the health of individuals and communities;” and consistently engaging UC Berkeley
partners like UC Berkeley Center for Cities and Schools Y-PLAN and the PLUS Fellowship to provide unique educational opportunities to local students as well as take advantage of the resources and expertise offered by many university departments.

These three institutions – the school district, community college and the City of Richmond – each have strategic plans with an equity focus – a focus that the education subcommittee has adopted wholeheartedly, and one that the Chancellor readily embraces in university-wide initiatives as well.

Taking into consideration opportunities for partnership and investment, as well as the challenges facing a community with a majority-minority student population and high numbers of English-learners, and students in foster care (WCCUSD reports that 75% of all students are Low-Income, English Language Learners and/or Foster Youth), the Subcommittee held regular meetings from March 2015 to January 2016. The 20-30 participants at each meeting actively learned about existing UCB and LBNL partnerships and programs in Richmond and mindfully collected community ideas on possible foci for recommendations. While many ideas to “scale up” some existing programs, or implement a promising practice that has succeed in a similar school district, have great merit, the Subcommittee recognized that the scope of the BGC Community Working Group’s recommendations around education need to be aligned and supported by partners in Richmond, keeping in mind access, equity, and scalability to ensure the greatest chance for successful implementation.

In addition, the members articulated three priority areas for recommendations:

- **Pipeline**: Bolstering institutional and student success at key transitions from elementary school to middle school to high school; from high school into college; and from college admission to completion of a degree.
- **Pathways**: Providing clear connections from middle school to college and career opportunities for all students. Ensuring ongoing support throughout.
- **Partnerships**: Leveraging and coordinating efforts of educational providers across the community to address gaps, improve accessibility, and avoid duplication.

As the Subcommittee developed their recommendations, they often requested presentations on programs and research to aid in informing their discussions. Presenters included Center for Educational Partnerships, Multiverse, UCB Admissions and the Superintendent of West Contra Costa Unified School District (Appendix D2). Key outcomes of the UCB Admissions presentation and relationship building with Richmond partners included that Admissions sponsored 14 high school and community partner counselors to attend the National Association for College Admission Counseling conference in San Diego in October, 2015, where they participated in multiple conversations about admissions issues, including a keynote from Sal Kahn about his work with access and Kahn Academy. Admissions, school district and community college partners hope to build on this relationship to increase one another’s knowledge about the needs of West County students, their counselors and the realities of the admissions process at UC Berkeley.

As the recommendations were formed, subcommittee members were tasked with soliciting feedback on key recommendation areas from their constituents. Feedback was provided by members of the school board; Contra Costa College staff, City staff, Richmond stakeholders
involved in development of the Richmond Promise Strategic Plan, and, thanks to the organizing efforts of representatives from the Ed Fund and the East Bay Center for the arts, from collaborative members of the Out-of-School Time collaborative and the West County College Access Network which include nearly a dozen local organizations.

Support for the Subcommittee’s ongoing work and goals, came from the West Contra Costa Unified School District (WCCUSD) in the form of a resolution that was unanimously passed by the Board of Trustees on October 21, 2015. (See Appendix D3, Resolution 46-1516: BGC Education Recommendations.) Key points in the resolution include WCCUSD Board of Education calls on UC Berkeley and LBNL to continue its investment in the educational goals prioritized by the Strategic Plan and Local Control Accountability Plan adopted by the WCCUSD Board of Education; make any partnership commitment consistent with the priorities of these plans; that UCB and LBNL support investment in the following areas; 1. Work-Based Learning; 2. Teacher Externships; 3. STEM Development, and 4. Expanded Learning Opportunities for Adults; and finally, the WCCUSD Board of Education encouraged the Richmond Community Working Group to develop a Memorandum of Understanding with UC Berkeley and LBNL that will be updated on an annual basis.

In drafting its final recommendations for CWG consideration, the Subcommittee took into account the district’s resolution and has emphasized the importance of alignment with the equity-based educational priorities of the school district as well as those of Contra Costa College, and more recently, with those of the Richmond Promise Strategic Plan. The Subcommittee also readily took into account the input provided by community residents and leaders that attended the CWG November 2015 Community Briefing.

**Brief Summary of Education Recommendations**

The Education Subcommittee is making four (4) primary recommendations. The following text was proposed by the Education Subcommittee and adopted by the Community Working Group over the course of two CWG meetings.

1. Commit to a Richmond Educational Partnership. *See more details below.*

2. Partner with the Richmond Community to develop and operate an Education Center, Museum and/or Visitor Center at the Berkeley Global Campus, with consideration for satellite and/or mobile centers within close proximity to transit hubs and schools.

3. Commit to funding a minimum of $3 million annually toward a Richmond Youth and Adult Education Opportunity Fund in partnership with the Richmond community, UC Berkeley, LBNL, and corporate partners to seed and scale new and existing best practice programs that model university/lab/school and community partnerships and to address barriers students face in taking full advantage of career and college exposure and preparation opportunities. The recommended minimum contribution is determined by an analysis of costs for programs currently providing student exposure and support, as well as professional development, in the Richmond community. The contribution is an estimate-based on 20% of Richmond sophomores, juniors and teachers participating in similar programs. (See Appendix D4, BGC Youth and Education Fund Cost Proposal.)
4. Partner with Richmond community-based organizations and regional transportation entities, as well as anchor institutions and funders, to provide **infrastructure improvements to increase accessibility of** educational programs, activities and resources. This includes specifically developing systematic and robust **communication and outreach** efforts to improve the distribution of program information and ensure accessible and inexpensive transportation options.

**Minority Opinion**

The Committee received an email on January 12, 2016, from Lee Lawrence, CCISCO Board member, promoting an additional recommendation regarding pre-school and day care facilities at the BGC. One UC Berkeley and one Berkeley community member voiced their agreement with this idea via email; as it did not receive a majority of Subcommittee members’ approval, it is included as a minority opinion to this report (Appendix D5).

**Richmond Educational Partnership Recommendation**

**Richmond Educational Partnership Recommendation**

Based on Chancellor Dirks’ May 2015 open letter to the Richmond community, the University of California, Berkeley is deeply committed “to advancing the greater good on both global and local levels”.

However, the Education Ad Hoc Subcommittee of the Berkeley Global Campus (BGC) Working Group has recognized from the start of our process that increasing educational opportunities and successful outcomes for Richmond students requires **sustained collaboration and community engagement** that goes beyond the University’s current programmatic offerings in Richmond and other Bay Area communities.

BGC Working Group members have consistently heard from students, parents, and community partners that UC Berkeley and LBNL programs offered in Richmond are not widely shared or accessible. Additionally, data on both participation and outcomes of Richmond students and faculty from West Contra Costa Unified School District and Contra Costa College in UC Berkeley and LBNL sponsored programs has been piecemeal and lacks rigorous assessment and evaluation.

Over the past five months, the Education Ad Hoc Subcommittee has been actively learning about existing partnerships and programs in Richmond and mindfully collecting community ideas on possible foci for recommendations. While many of these ideas have great merit, the ad hoc subcommittee recognizes that the scope of the BGC Working Group’s recommendations around education need to be aligned and supported by partners in Richmond, keeping in mind access, equity, and scalability to ensure the greatest chance for successful implementation.

To this end, the Education Ad Hoc Subcommittee **recommends that UC Berkeley and LBNL commit to a long-term, codified educational partnership with high-level administrators and key education partners in Richmond to create sustained identification, assessment, and investment in mutually beneficial programs and initiatives which boldly address the critical educational and societal issues that impede the development of activities, curriculum, resources and, professional development to help prepare educated and**
engaged students. This level of community engagement and collaboration will require a commitment to data-sharing, development of shared goals, transparent communication, and investment of both financial and human capital toward advancing the greater good in Richmond.

Furthermore, the Education Ad Hoc Subcommittee recommends that a Richmond educational partnership is established within the first quarter of 2016 or when UC Berkeley and LBNL agree to the Richmond Partnership Compact (whichever comes first) and that a data-driven, strategic plan with key benchmarks, activities and assessments is jointly adopted, and widely communicated, by the educational partnership within six -months of convening.

The strategic plan, and resulting agreements, should address the following key areas summarized from the Draft Recommendation Matrix:

A. College Exposure and Preparation
   1. Support and expand college advising at Richmond middle and high schools.
   2. Support and expand experiential learning and academic preparation for students- pre-K to adult.
   3. Increase college knowledge & reinforce college-going culture and transfer opportunities for Richmond students.
   4. Increase financial aid availability by partnering with Richmond Promise.

B. Career Exposure and Readiness
   1. Support multi-partner coordination by investing in work-based learning partnerships and related curricular alignment across UCB, LBNL, and educational and community partners.
   2. Support success by investing in research and evaluation of work-based learning.
   3. Solicit partnerships with regional and local employers to provide systematic opportunities for work-based learning, internships, and field trips, including support for career pathways and STEM development.

C. Teacher and Staff Professional Development
   1. Facilitate partnerships that provide opportunities for K-14 and adult education teachers and staff to participate in externships in business, STEM, etc.
   2. Facilitate partnerships that support K-14 curriculum development and implementation.
   3. Provide professional development for K-14 and adult education teachers and staff, including content support, pedagogy and training in areas such as literacy and contextualized learning (e.g., literacy and STEM).
   4. Provide training for tutors and mentors to support students.

D. Universal Preschool Education
   1. Recognizing the fact that many Richmond children grow up in poverty and are already behind by kindergarten, preschool education was identified as a priority for some community members. It is included here as a placeholder for further discussion/consideration.
The strategic plan, and accompanying agreements, should be aligned with local priorities, including the West Contra Costa Unified School District Local Control Accountability Plan, the Contra Costa College Strategic Plan, the Richmond Promise Strategic Plan and other documents that have been developed with extensive community participation. The strategic plan should also detail timeline and milestones, agreed-upon goals and measureable outcomes for all programs and activities, metrics to ensure accountability, and a comprehensive evaluation plan that will drive continuous assessment and improvement.
**Procurement Subcommittee**

**Background on the Recommendation Development Process**
The overarching goal of the Procurement Ad Hoc Subcommittee of the Berkeley Global Campus (BGC) Working Group is to generally increase procurement opportunities and successful outcomes for Richmond residents and small business. The Subcommittee endeavored to (1) develop actionable recommendations that built on the assets and leadership of Richmond’s business community and other efforts to spur economic revitalization; and (2) strengthen existing relationships between Richmond businesses, intermediaries, and UC Berkeley and the LBNL’s supply chain management.

**Subcommittee Composition**
To ensure the viability of recommendations, the Procurement Ad Hoc Subcommittee consisted of wide variety of representatives including community groups, small business advocates, local government agencies, and UCB staff. The organizations that participated included:

- The Richmond Main Street Initiative (chair)
- City of Richmond, Office of the Mayor
- Richmond Chamber of Commerce
- The City of Richmond Supply Chain
- Contra Costa County Small Business Development Center
- UC Berkeley and LBNL Supply Chain Managers
- Healthy Richmond

The subcommittee benefited from the partnership and support of Healthy Richmond, the HUB for a multi-sector partnership dedicated to advocating for policy and system changes that can support healthy economic revitalization. With a sharp focus on aligning the procurement practices of public and private *Anchor Institutions* to strengthen small businesses and social enterprises, Healthy Richmond dedicated financial resources and leadership to partner with the procurement subcommittee to conducted targeted outreach to businesses in Richmond.

**Context and Assets to Build Upon (Rationale for Recommendations)**

**Baseline Data**
In addition to their inherent working knowledge, Subcommittee members reviewed data on Richmond-based businesses, relevant technical assistance and capacity building programs, and procurement policies of local institutions. As a foundation, UC Berkeley’s Small & Divers Business Program and LBNL’s Small Business Program currently coordinate efforts to outreach and educate local businesses and advocacy groups through workshops and other events. Similarly, several local procurement policies – most prominently Richmond’s Business Opportunity Ordinance and Chevron’s Community Benefits Agreement – are already proving invaluable as models for future Berkeley Global Campus procurement.

<table>

<tr>
<td>UCB</td>
<td>$4.1 M</td>
<td>$2.99 M</td>
</tr>
<tr>
<td>LBNL</td>
<td>$16 M</td>
<td>$13 M</td>
</tr>
</tbody>
</table>
Also reviewed were metrics on UC Berkeley and LBNL’s existing local spend, the structure of their supply chain and contracting requirements, and programs and policies designed to increase purchasing with small and historically disadvantaged businesses. Most recently in the 2-year period including FY 2013 and FY2014, over $36 million of total purchasing by LBNL and UC Berkeley has flowed through approximately 800 Richmond-based business.

Importantly, the subcommittee also found that the University and LBNL supply chain leadership is undertaking outreach education to local businesses in partnership with Richmond business support intermediaries. Apart from the BGC related business outreach described earlier, UC Berkeley’s Small & Diverse Business Program and LBNL’s Small Business Program Directors conducted workshops for local businesses in education and outreach events sponsored by the City of Richmond, the Richmond Mainstreet Initiative, the Richmond Chamber of Commerce, the Contra County Small Business Development Center and others. The establishment of these working relationships should prove invaluable to any future collaboration to engage larger numbers of Richmond based businesses.

Robust Community and Local Business Input
Along with the guidance from its members and, the Procurement Subcommittee also sought meaningful input from local businesses, residents, and other industry experts to understand and document principal needs and viable solutions.

In August 2015, with Mayor Tom Butt’s support and UC Berkeley’s involvement, Healthy Richmond and the Procurement Sub-Committee collaborated with the Richmond business community to convene a Business Leader’s Breakfast to understand and define what policies and programs best support small and local business in Richmond. Over 80 participants conveyed their input through facilitated table discussions, polling, and an online survey. The community input established a general framework of Procurement Recommendations.

The framework was further developed and refined with the help of industry experts that had served as Business Breakfast facilitators, and the Procurement subcommittee. A second Business Breakfast was convened in November 2015 to present and vet the draft Procurement recommendations in a more developed form. These again were well received and confirmed that the draft recommendations had the support of the Richmond business community.

Richmond is eager to participate, barriers persist
In general, the input confirmed that the Richmond area business community is excited to collaborate with UC Berkeley and the Lawrence Berkeley National Lab on the Berkeley Global Campus at Richmond Bay. There are many local businesses eager to contribute to the construction and to provide ongoing services that will be needed at the Berkeley Global Campus. As a proposed world class institution the BGC development presents as a pivotal opportunity to integrate and build up the surrounding Richmond community.

In large measure, Richmond business profile can be described as consisting of small, locally-owned businesses composed of historically underrepresented groups and communities. The challenges faced by such communities are well documented and several government policies at every level exist to mitigate those impacts. Viewed through that lens, the Procurement
recommendations are specific strategies that similarly intend to enhance the capability, capacity, and opportunity of local businesses to compete.

**Improved Communication Needed**
A specific barrier described from the business community and addressed through the recommendations relates to a lack of education and information about the procurement process. From announcements, to partnering process with prime contractors, and education and capacity building, a more robust communication platform is requested. The Procurement recommendations stress the importance of the role of UC Berkeley and LBNL – working in collaboration with community and business advocates – in fomenting knowledge and information that is specifically aimed at improving the procurement outcomes.

**Help Build Capacity of Local Firms**
To better compete over the long term for construction and ongoing procurement jobs, the Procurement recommendations pose a number of strategies to help build the business capacity of local businesses. Capacity building efforts will pay off in the long term by fortifying the administrative systems of small firms, making them more resilient and adaptive to procurement needs that surface. Specific capacity building strategies recommended include for instance establishing a dedicated fund, facilitating trainings and necessary certifications, augmenting administrative support programs to include accounting, bid support, payroll services, and supporting a center to house these services.

**Capital and Contracting Limitations**
A fundamental limitation of small businesses is lacking equity or collateral that limits a firm’s access to capital, credit, and/or loans. This is crucial limitation prevents firms from ramping up for a large job with additional employees, or improving the business infrastructure, or investing in equipment. As such, this dynamic prevents firms from not only soliciting jobs but even in considering work. Similarly, insurance and bonding requirements are often an onerous challenge to surmount, especially when required for small businesses functioning as a small subcontractor. Solutions are recommended that would potentially create a guaranteed line of credit and improve the bonding options for small firms.

**Local Procurement**
With the efforts and solutions presented above to improve the capacity and overall competitiveness, small businesses in Richmond would be in better condition to serve and achieve a 25% local spend goal specified in the Procurement recommendations. The effort would entail integration of local set aside of direct prime contracts for local businesses, incentivizing procurement officers to reach those goals, and redefining the bid process to ensure best value and socially responsible contracts.

**Brief Summary of Procurement Recommendations**
For the purposes of applying the Procurement recommendations to the development of the Berkeley Global Campus, the Procurement Ad hoc Subcommittee is recommending the following definition of “local”:

Local Definition includes Richmond, North Richmond, and Unincorporated areas of North Richmond. Second Priority is San Pablo.
In addition, the Procurement Ad hoc Subcommittee is making six (6) primary recommendations, and various specific strategies described below:

1. UCB and LBNL shall set a goal of 25% local spend and adopt policies for increasing procurement from Richmond businesses in design and construction and through regular procurement.
   - In design and construction procurement, integrate formal preferences for 25% local spend are into subcontracts to produce legally binding results, and that a specific percentage of set-aside direct contracts for local small business are reserved.
   - For non-construction procurement, establish a goal for increasing non construction procurement from Richmond based businesses over five years.
   - In general procurement, adopt processes and policies that establish prompt payment and invoicing mechanisms, that select bidders based on best value, and that establish socially responsible contracting to include an assessment of a bidder’s labor, environmental, and workplace practices.
   - In addition, for general procurement, apply established policies to other sectors including specifically the solar industry, and design services, and food services and local farms.

2. UCB and LBNL shall expand outreach and education on new construction and ongoing procurement.
   - Assign specific UCB/LBNL staff to expand outreach and education efforts that include promoting, creating, or attending vendor outreach events.
   - Develop preconstruction workshops between prime and subcontractors, as well as a supplier mentor/protégé program with incentives for prime contractors to participate.
   - Establish a one-stop-shop on the new BGC campus to function as a business and information resource center for local firms.

3. UCB and LBNL shall invest in and/or partner with Richmond strategies, programs and partnerships that increase access to capital.
   - Contribute to an established a program for capital improvements, and to expand the City of Richmond’s Revolving Loan Fund.
   - Fund incentives that require coordination of the local small business support system
   - Establish and/or contribute to a Collateral pool or guaranteed line of credit that serves as a $5M set aside for small businesses.

4. UCB and LBNL shall invest in and/or partner with Richmond strategies, programs and partnerships that address bonding challenges.
   - Improve bonding availability or couple with prime-sub contracts.
   - Require primes to require wrap-around insurance policies as opposed to contractor default that covers prime only
5. UCB and LBNL shall invest in and/or partner with Richmond strategies, programs and partnerships that build capacity of Richmond Businesses to compete.
   - Increase the numbers of businesses that are certified through training sessions on certification application and by simplifying application process and by establishing certifications reciprocity policies and common licensing agreements.
   - Provide, fund, and/or support a Blueprint room for contractors and support a new fund for launching and building capacity of small, locally and worker-owned businesses, including support and/or participation in capacity building workshops.
   - Extend partnerships, especially beyond construction including cleaning, HVAC maintenance, and building controls systems maintenance
   - Create and/or support a program that provides back office administrative support, including for example accounting, bid support, payroll services

6. UCB and LBNL shall commit to regularly assess and address policies and protocols that create barriers for local, small and micro enterprises to assess UCB and LBNL procurement opportunities.
   - Structure contracts and bidding process to encourage inclusion of small, minority and worker-owned businesses by using a standard definition of MBE, WBE to include zip code
   - Encourage partnerships between large and small vendors
   - Review insurance and bonding requirements to consider and address policies that present barriers to small business
SECTION III: NEXT STEPS

“The proposed Berkeley Global Campus itself is much more than an entirely new form of international institution of higher education and research. The success of this project will be measured not just by the extent to which it supports our teaching and research mission. Equally important to us is the degree to which it generates new economic activity, jobs, educational programs and civic opportunities in Richmond. In short, I see it as an extension of our deep commitment, as a public university, to advancing the greater good on both global and local levels.”

--UC Berkeley Chancellor Nicholas B. Dirks

The University and LBNL leadership, in addition to various campus departments, will comprehensively review this CWG report in its entirety. In spring of 2016, campus leadership will meet internally to discuss the recommendations and the policy, legal, and financial context that impact their implementation. After consulting internally with the appropriate University and LBNL decision-makers, campus leadership will meet with the CWG and discuss the recommendations. Although University and LBNL leadership may not come to agreement on all of the recommendations, there will be an ongoing dialogue to determine how to best realize the desired outcomes of the CWG recommendations.

Next, the Directors of the Office of Community and Government Relations will develop the draft Richmond Compact based on the final recommendations. The Richmond Compact will represent the binding, legally enforceable commitments to the Richmond community regarding benefits from the BGC in education, housing, local hire and workforce training, and local procurement. Chancellor Dirks will meet with the CWG in the spring of 2016 to formally sign the Richmond Compact and to usher in the next phase of this collaborative process.

Legally Enforceable Community Benefit Commitments

The CWG has reviewed and discussed various approaches used by private developers, cities and universities to establish legally enforceable community benefit commitments on development projects that have some similarities to the BGC. These community benefit agreements specify benefits that will be accrued, responsibilities of developers, city and other partners, including investments and an approach to monitoring the results of each element of the agreement.

By formalizing community benefit commitments in the Richmond Compact, UC Berkeley and the LBNL can ensure all parties that its community benefit commitments are meaningful and durable. In order to be effective in this regard, the Richmond Compact should include the following attributes:

1) The Compact should be legally binding, and entered into by U.C. Berkeley, a range of Richmond-based stakeholder organizations, and the City of Richmond.

2) The Compact should be enforceable by all parties.
3) The Compact’s commitments should apply both to U.C. Berkeley’s and LBNL operations at the BGC, and to operations of private contractors and to developers that participate in the project over time.

4) The Compact should be specific regarding operational and financial commitments required of project participants.

5) The Compact should require implementation and compliance information regarding community benefits to be public information, and require U.C. Berkeley and the LBNL to release semi-annual reports on community benefits implementation.

The Community Working Group believes that through a Compact meeting the above criteria UC Berkeley and the LBNL can set a new standard for town-gown relations, and show a new way forward for Richmond and for the University of California’s continued engagement with the communities it serves. Please see Appendix F1 and F2 for more details.

**Implementing the Richmond Compact**

Following the signing of the Richmond Compact, the University and LBNL will appoint a community advisory body to assist with implementing the recommendations and monitoring progress. This community advisory body will likely include representatives from the Community Working Group and other enlisted partners. To ensure forward progress and transparent communications with the broader community, the advisory body will meet quarterly and receive regular BGC updates.

With support from the community advisory body, the University and LBNL will regularly track and report implementation results and outcomes. In order to assess whether we are reaching or moving toward our stated goals, we will refine our evaluation framework, identifying specific indicators and measures of success for each desired outcome and strategy. Through honest reflection, bold vision, prudent planning, and careful, collaborative implementation, the positive impacts that the University, LBNL and the CWG hope to realize for the Richmond community will multiply-- yielding a better future for us all.
