

Barrows and LeConte Halls

Sun, Jul 5, 2020 at 9:56 AM

To: building-name-review@berkeley.edu

Dear Building Name Review Committee,

I am writing to you today on behalf of 1,269 faculty, staff, and students, and alumni as well as 75 campus organizations who want the names of Barrows and LeConte Halls, and white supremacist legacies they perpetuate, to be immediately removed. Attached is a letter bearing the rationale for this request and a list of the signatories. Additional signatories are added each day as the [Google Doc](#) continues to circulate within the campus community.

In solidarity,

1,269 campus community members and 75 organizations

Call to remove white supremacist names from campus buildings.pdf

187K

Dear Building Name Review Committee and Chancellor Christ,

We, the undersigned, stand in solidarity with protestors all over the world in affirming that Black Lives Matter and in committing to dismantling the pervasive effects of systemic racism in our society. We call on UC Berkeley to immediately and permanently remove the names of the white supremacist namesakes from Barrows and LeConte halls, and begin the process of selecting new names whose legacies are consistent with our shared values.

David Prescott Barrows, a former president of the University of California, spent time in the Philippines serving as the superintendent of schools in Manila in the early 1900s [1]. During this time, he described Philipinxs as “savages” and instituted a system of education meant to “civilize” and reform “the vicious system of teaching current in Filipino schools.” [2]. He described Black people as living like “wild beasts” who were “much more barbarous and wild than” Pilipinxs [3].

John and Joseph LeConte were two of the first faculty members of the University of California. They were also slave-owning Confederate scientists who manufactured gunpowder during the civil war, pushed pseudo-scientific theories of white racial supremacy, and vehemently opposed Black people having the right to vote. On the latter subject, Joseph LeConte once said, “The Negro race as a whole is certainly at present incapable of self-government and unworthy of the ballot.” [4].

These are not the types of people we should be memorializing on the buildings of our campus. Barrows Hall, in particular, is currently the home of the department of African American studies, which is simply abhorrent. Every day that these names remain is an affront not only to the people of color within our community, but also to our shared values as a University.

This is not the first time this issue has been raised. In 2015, the Black Student Union raised a similar demand to Chancellor Dirks [5]. This led to the creation of a Building Naming Project Task Force, which issued a 41-page report in 2017. Three years later, both buildings' names remain unchanged. Others have already pointed out the inexcusable inadequacy of this response. [6]

This failure to take any meaningful action is unacceptable and must be rectified immediately. As the recent denaming of the Law Building shows us [7], stripping a building’s name on the basis of its namesake’s racist legacy is very much within the realm of possibility. While there may be a process involved in selecting new namesakes consistent with our values, stripping these buildings of the current names and the racist legacies they uphold can and should happen immediately.
